Capacity to adapt to new technologies

Strong auto-learning skills

Results Orientation

ABOUT ME

Recently graduated in Information Technology Engineering, my passion lies in web application development. Specialized in LARAVEL, I excel in building solutions from backend to frontend. I use Bootstrap for agile projects and Tailwind CSS for more elaborate initiatives. I have a solid foundation in relational databases.

EXPERIENCES

VOLUNTEER WORK

Un Cachito de Luz A.C. l Cd. Victoria/Tamaulipas   2017 - 2022

Designed a database and donation delivery capture system for medications using Visual Basic.

FULL-STACK DEVELOPER

ITACE l Cd. Victoria/Tamaulipas   FEB 2020 - MAR 2020

Designed and developed a .NET application programmed in Visual Basic for attendance registration using QR codes. The application also sends alerts to parents regarding the entry and exit activities of their children at the institution.

BACK-END DEVELOPER

Cactu Nieves l Cd. Victoria/Tamaulipas   MAR 2022 - APR 2022

Designed, developed, and implemented a .NET application programmed in C# for managing sales processes and administration within the company.

FRONT-END DEVELOPER

SVAM international l Cd. Victoria/Tamaulipas   JAN 2022 - FEB 2022

Created and executed the update of the interface for the LEADS web application, using Bootstrap 5 and incorporating Datatables and Google Charts.

FULL STACK DEVELOPER

UPV l Cd. Victoria/Tamaulipas   SEP 2023 - DEC 2023

Designed and developed an application in LARAVEL and FLASK in conjunction with ARDUINO for facial recognition attendance for students at the Polytechnic University of Victoria. The project is currently in the internal implementation process at the institution.
